

Releasit®

Encapsulation Cleaning Technology

Encapsulation

Releasit sets the industry standard for encapsulation cleaning. Carpets stay clean longer, high production rates are achieved, wicking and recurring spills are eliminated. Releasit's **ENCAP-CLEAN™** and **ENCAP-CLEAN DS™** are state of the art encapsulation scrubbing detergents. **ENCAP-PUNCH™** is a heavy duty 3-in-1 encapsulator — pre-spray, rinse and pad/bonnet cleaner. **ENCAP-SPOT™** is a multi-purpose encapsulation spotter and odor treatment. **SOILEZE™** is a fluoro-protector that's fully compatible with the Releasit product line. All of Releasit's detergents are formulated with a unique soil-trapping encapsulation polymer — **CRYSTALON3™** that captures soil, releases from the fiber, and is then extracted through post vacuuming. All Releasit products contain **SOILEZE™** protector helping carpets to stay clean longer.

Cimex Planetary Scrubber

Three 400 rpm scrubbing heads scrubbing clockwise and counter-clockwise at the same time safely address all sides of the carpet fiber with maximum agitation. The 19" Cimex cleans at 2,000-3,000 sq ft per hour. (6.6 gallon tank)

Carpet-Avenger Propane

Powerhouse scrubbing is achieved with the 21" propane powered Carpet-Avenger. Scrubbing torque is unmatched by any electric scrubber. Commercial carpet scrubbing maxes out at 6,000+ sq ft per hour. (7.7 gallon tank)

Sprint Multi Purpose Scrubber

Dual 14" cylindrical brushes lift and scrub carpet fiber at 650 rpm as detergent sprays from the Sprint's onboard tank. It's quick, nimble, and easy to operate! Also scrubs and dries hard flooring with a unique recovery system. (4 liter tank)

Pile-Master Scrubber

Dual cylindrical brushes (15" or 20") lift and scrub carpet fiber at 480 rpm. Can be used for encapsulation scrubbing as well as dry powder cleaning. And the optional Collection/Hoppers enable deep pile lifting with dry soil recovery.

Challenger OP Machine

The Challenger oscillating pad machine is a random orbital machine featuring two movements... First a random orbit is generated allowing the pad to clean all sides of the carpet fibers while also utilizing a freewheeling revolution. It's the smoothest OP machine you'll ever run.

Steamin Demon Extractor

Patented HI-FLOW extraction, pumps and recovers 3-4 gallons of water per minute through the carpet to deep rinse the fiber (more than any other extractor ever made). Auto-fill and auto-dump ends the bucket brigade. Available in 15" and 20" models.
