

# Releasit BIO-ENCAP is a powerful encapsulation cleaner that's good for the environment.

"Green" Doesn't Have To Be Wimpy!

All of the Releasit products are easy on the environment. BIO-ENCAP takes it a step further. Releasit BIO-ENCAP has been awarded the EPA's DfE approval. Low water usage, no waste-water (sewage) produced, and environmentally sound ingredients contribute to this highly effective "Green" encapsulation cleaning system.

BIO-ENCAP contains a unique environmentally friendly encapsulation bio polymer CRYSTALON-bp which enables encapsulated soil to be extracted from the carpet with subsequent post-vacuumings. The crystallized detergent residue can not attract soil so resoiling is minimized and carpets stay clean longer between cleanings.

*"When you see the DfE logo on a product it means that the DfE scientific review team has screened each ingredient for potential human health and environmental effects and that—based on currently available information, EPA predictive models, and expert judgment—the product contains only those ingredients that pose the least concern among chemicals in their class.*

*Product manufacturers who become DfE partners, and earn the right to display the DfE logo on recognized products, have invested heavily in research, development and reformulation to ensure that their ingredients and finished product line up on the green end of the health and environmental spectrum while maintaining or improving product performance." — from the EPA's website*

## BIO-ENCAP FEATURES

**Double Strength 32:1 4 ounces per gal.**

|  |  |
|--|--|
| Fast cleaning production rates                                     | Ideal for commercial maintenance         |
| Deep penetrating cleaning  | Dries to a crystallized residue          |
| No rinsing is required   | Reduces wicking & recurring spill stains |
| Safe for stain-resist, most wool, and all types of synthetic fiber |  |
| Non-sticky encapsulated residue will not attract other soil        |  |
